TQMI visit to JSW Vijayanagar

18th June 2025
JSW Vijayanagar

On June 18th and 19th, 2025, JSW Steel Vijayanagar had the privilege of hosting Mr. Janak Mehta and Mr. Rupam Bhaduri, esteemed consultants from TQMI, as part of our journey toward the Deming Grand Prize. The visit began with a tour of our Group Experience Centre, where they gained insights into JSW's journey and operational excellence. This was followed by a strategic discussion with Mr. L R Singh, COO, focusing on our vision for the future, commitment to continuous improvement, and the roadmap to achieving the Deming Grand Prize. The consultants, accompanied by our TQM team, visited BRM-1, where they assessed processes and acknowledged the plant's strong performance. Key discussions revolved around Critical-to-Process (CTP) and Critical-to-Quality (CTQ) parameters, their monitoring through control charts, and understanding process variation. The team also emphasized stability and conformity analysis, defect reduction, and the importance of 5S in maintaining workplace efficiency. Later, they visited HSM-2 to observe processes. During their assessment of BF-4 (Blast Furnace-4), the consultants highlighted the need for real-time process monitoring using control charts at the shop floor level. They reviewed the linkage between KPI trees and control points, stressing the importance of an abnormality analysis framework

Visit through Experience Centre

Review session with Top Management

and SOPs for corrective actions. Additionally, they recommended refining Quality KPIs to align with customer value creation. A key highlight was their visit to the Climate Action Centre, where carbon emissions from each furnace are monitored. The consultants suggested strengthening gap analysis to further enhance sustainability efforts. The day concluded with an executive session, reflecting on JSW's progress since winning the Deming Prize and addressing key challenges ahead. Mr. Janak Mehta emphasized a focused, mission-driven TQM approach rather than fragmented initiatives, while underscoring the critical role of leadership involvement. He also discussed what were the key effects post-Deming and our purpose of trying to achieve Deming grand prize and why we need it. TQMI pointed out that while our current OSM has been effective in driving business goals, a true Deming Prize company must integrate TQM KPIs into its core. This means expanding OSM to encompass Daily Management, Policy Management, Employee Engagement, Cross-Functional Collaboration, Quality Assurance (QA), and Small Group Activities (SGAs), Kaizen, OPL, QCs, etc. TQMI also addressed need to elevate our Quality Assurance (QA) system to the next level.

On June 19th, Mr. Rupam Bhaduri assessed CRM-2 (Cold Rolling Mill-2), providing actionable insights for operational excellence. The visit concluded with a closing session with Mr. L R Singh, where the consultants shared their observations and strategic recommendations to accelerate our Deming Grand Prize journey. This engagement has reinforced our commitment to excellence, innovation, and customer-centric quality, driving us closer to global benchmarks in steel manufacturing.

JSW Steel Vijayanagar Receives **NAMC** Gold Award

15th April 2025
JSW Vijayanagar

We are pleased to announce that JSW Steel Vijayanagar has been honored with the Gold Award at the National Award for Manufacturing Competitiveness (NAMC) for the year 2024–25. This prestigious recognition, conferred by the International Research Institute for Manufacturing (IRIM), underscores our commitment to excellence in manufacturing competitiveness. The NAMC assessment process is uniquely driven by the principle of “Priority Adapt” — a strategic approach that encourages organizations to identify, prioritize, and adapt key competitive factors critical to their success. This enables companies to tailor their improvement initiatives effectively across areas such as operational efficiency, innovation, sustainability, and workforce engagement, ensuring sustained manufacturing excellence. The award ceremony was held in Mumbai, On 15th June 2025 where our esteemed Chief Operating Officer, **Mr. L R Singh**, proudly accepted the accolade on behalf of the organization. This achievement reflects the collective efforts of our teams and reinforces our position as a leader in the manufacturing sector. In the accompanying image, you will see our senior leadership team engaged in a focused discussion with three NAMC auditors. This meeting underscores our proactive approach in aligning with NAMC’s Priority Adapt philosophy, emphasizing continuous evaluation and agile response to evolving manufacturing challenges. This recognition serves as a testament to JSW Steel’s dedication to competitive excellence and motivates us to continuously innovate and improve in all aspects of our operations.

Priority Adapt session with Top Management

In Picture: Top Management, NAMC Assessors & TQMI team

Over a period of 5 hours a bootcamp session was conducted for the senior management called as Priority Adapt which identified 5 focus areas for Competitive advantage involving criterion, indicator & scale.

The senior management have prioritized the following key focus areas which will be adapted in the next 3 years.

- Low grade iron ore capability
- Backward integration of coal
- Captive development of logistics
- Creating techno economic collaborations
- Capacity building

5S & QC Tools Training for Mines Team

30th June 2025
JSW Vijayanagar

TQM team recently conducted a training session for Mines employees on QC Circle methodology, 7QC tools, and 5S implementation. The interactive session equipped participants with practical quality improvement techniques to enhance operational efficiency. This initiative reinforces our commitment to building a culture of continuous improvement across all operations.

Advancing Excellence:

Four Employees Earned Six Sigma Black Belt Certification

We are pleased to announce that four of our six sigma trainees have successfully earned their Six Sigma Black Belt certifications through our intensive internal training program. This significant accomplishment demonstrates their mastery of advanced DMAIC methodologies and positions them to lead critical process improvement initiatives across our operations. Their certification reflects our ongoing commitment to building internal expertise and fostering a culture of continuous improvement. These newly certified Black Belts will now play a pivotal role in driving data-driven problem solving, optimizing processes, and delivering measurable operational enhancements. Congratulations to all four professionals on this outstanding achievement that strengthens our organization's quality and efficiency capabilities. We look forward to the valuable contributions they will make in their new roles as change agents and improvement leaders.

Mr. Ajit Jain
CMD
Increase the availability of SMS-3 Hot metal crane from 98% to 99.60%

Mr. Rajesh Mishra
Oxygen Plant
Specific power reduction by PPU bed optimization & GOX venting reduction

Mr. Vikas Sharma
CRM - 1
Reduction in NCO in Panel grade material from 4% to 3.8%.

Mr. Siddalinganagouda
SMS - 1
Increase in LHF Slag Briquettes production for use at JSW Steel Units

Mr. Niti Kumar Jain
CRM - 2
Increasing transfer of RO water to HSM 2 from 700M3/DAY to 1200 m3/day

ISQ Quality 4.0 Symposium – Digital Transformation Through Quality

The TQM team is pleased to spotlight the ISQ Quality 4.0 Symposium, held on January 23–24, 2025, at R.V. College of Engineering, Bengaluru. Organized by the Indian Society for Quality (ISQ), the event centered around the theme “Digital Transformation through Quality”, drawing professionals and thought leaders from across the manufacturing and quality domains. The symposium featured expert sessions on data analytics, Industry 4.0 technologies, IoT integration, and digital-first quality frameworks,

providing valuable insights into how industries can align their quality strategies with emerging technologies. We are proud to share that our JSW Logistics team presented a technical paper at the event—and their contribution was recognized with the **Best Paper Award**. This achievement highlights our organization’s forward-thinking approach and the team’s innovative application of digital tools in logistics and supply chain management.

The event served as a powerful platform for exchanging ideas, learning from industry peers, and identifying actionable strategies that can strengthen our digital quality initiatives. Congratulations to the JSW Logistics team for this prestigious recognition

JSW Steel Vijayanagar Works Honored with Prestigious Safety Award

JSW Vijayanagar

JSW Steel Vijayanagar Works has been recognized for its outstanding commitment to workplace safety, receiving the “Platinum Award for Excellence in Safety” in the Steel Manufacturing Sector from the Green Enviro Foundation, New Delhi. The award was presented on January 11, 2025, highlighting the plant’s industry-leading safety practices and dedication to employee well-being. This accolade reinforces JSW Steel’s position as a benchmark for safety excellence in the steel industry.

JVML HSM-3 Secures ISO Certification Recommendation

JSW Vijayanagar

JSW Vijayanagar Metalics Limited (JVML) has successfully achieved recommendation for Integrated Management System (IMS) certification from TÜV Rheinland, covering ISO 9001:2015 (Quality), ISO 14001:2015 (Environmental), and ISO 45001:2018 (Safety) standards for its Hot Strip Mill-3 facility. The certification process, initiated in October 2024, included rigorous Stage 1 and Stage 2 audits in December 2024. TÜV Rheinland commended JVML’s efforts in meeting the stringent requirements for manufacturing flat hot-rolled steel coils. Final

certification from TÜV Rheinland's Germany headquarters is expected shortly, marking a significant milestone in JVML's commitment to operational excellence and continuous improvement.

JSW Steel VJNR Achieves Prestigious Responsible Steel Certification

JSW Vijayanagar

In a significant milestone for sustainable steel production, JSW Steel Vijayanagar Works has been certified as "Responsible Steel"—a globally recognized standard for environmental, social, and governance (ESG) excellence in the steel industry. This certification underscores the plant's commitment to reducing carbon emissions, ensuring ethical sourcing, and upholding the highest standards of worker safety and community engagement. The achievement aligns with JSW Steel's broader vision of green manufacturing and positions Vijayanagar Works as a leader in sustainable steel production. Combined with recent accolades like the Green Enviro Foundation's Platinum Safety Award (2025), this certification reinforces the facility's dedication to operational excellence and responsible growth.

Ashok Leyland audit at HSM - 3

JSW Vijayanagar

Since its commissioning in 2024, JSW-JVML-HSM 3 has been a key contributor to our production capabilities, efficiently supplying high-quality materials to numerous customers. Among them, Ashok Leyland one of our major clients. As part of the ongoing process to obtain customer approval from Ashok Leyland for the HSM3 route, an audit was conducted recently. with an initial assessment followed by a final audit on June 13, 2025. The audit consisted of both technical and non-technical assessment. The Ashok Leyland audit team was particularly impressed with the innovative SPCL Pallet Re-usage System, a sustainable and cost-effective initiative that has now caught their interest for potential implementation at their own facilities. Out of 75 audit points, we have successfully closed 72, by the collective effort of 26 departments demonstrating our strong commitment to operational excellence and continuous improvement.

Future Events

- Interdepartmental QC competition - 2nd week of July
- CCQC - 2025 ON September 14th

Quote of the day

W. Edwards Deming
American business theorist
14/10/1900 - 20/12/1993

"The most valuable "currency" of any organization is the initiative and creativity of its members. Every leader has the solemn moral responsibility to develop these to the maximum in all his people. This is the leader's highest priority."

TQM Crosswords

Across

- [2] The 80/20 rule tool that identifies vital few problems
[3] Diagrams showing relationship between two variables
[5] Chart showing data points plotted in time order
[7] Method of dividing data into categories
[9] Visual representation of process steps
[10] Simple data collection sheet

Down

- [1] Group technique for generating ideas (often used with QC tools)
[4] Tracks process stability over time
[6] Bar graph showing frequency distribution of data
